SOURCE REFERENCES

This research aid was based on a wide variety of open and classified sources. The value of each type of source varied from one part of the research aid to another. For example, estimates of production of tractors at the Minsk Tractor Plant were derived entirely from open sources, whereas estimates of production at the two Khar'kov tractor plants were derived from a combination of open and classified sources. 25X1C [redacted] were of particular importance for the estimates on the Khar'kov plants. Although not documented directly in this research aid, [redacted] 25X1C 25X1C [redacted] for confirmation that DAZ produced tractors throughout the 1954-59 period. [redacted] 25X1C 25X1C [redacted] gave no information on output, and those which did were not in agreement on the rate of output. There were several, however, which confirmed the general magnitude of the output estimated in this research aid. 25X1B

Evaluations, following the classification entry and designated "Eval.," have the following significance:
